# HoshAI Presentation

Unified Artificial Intelligence Platform for Multiform Content Creation

www.hoshai.com

May AI help you?

A single platform for generating all types of AI content. Text, Image, Video, Audio.

Problem Statement

The Problem:

- Users face fragmented experiences and spending structures due to multiple AI providers.
- Subscriptions for each platform are required, leading to high costs and complexity.
- Free-tier subscriptions are limited, requiring users to upgrade to access full features.
- Users struggle with different prompt techniques across platforms.

Solution Statement

The Solution: Simplifying Generative AI Access

- **Single Platform:** Access all AI providers and content types with one subscription.
- **Budget Flexibility:** Adjust spending according to true requirements, saving costs.
- **Ready-made Templates:** Eliminate the need for prompt engineering, enhancing user experience.
- **Content Management:** Securely store and save generated content for future use, increasing productivity.

About Us

- Welcome to **HoshAI,** a pioneering force in artificial intelligence, established in 2024 in Windsor, Ontario, Canada.

- Led by a team of seasoned founders, we are committed to delivering cutting-edge AI services that are not only groundbreaking but also universally accessible.

- **HoshAI** is a single, integrated platform that leverages Artificial Intelligence (AI) to create a variety of content types. This includes text, images, videos, and audio.

- The platform is designed to serve as a comprehensive solution for content creation, offering users the ability to generate all types of content in one place.

- Our **mission** is to democratize AI technology, making it accessible and impactful for everyone.

- Our collaborations with leading AI companies such as **OpenAI, Anthropic, Google, Azure, Stability, Azure, AWS, and ElevenLabs** enable us to offer a comprehensive suite of AI services.
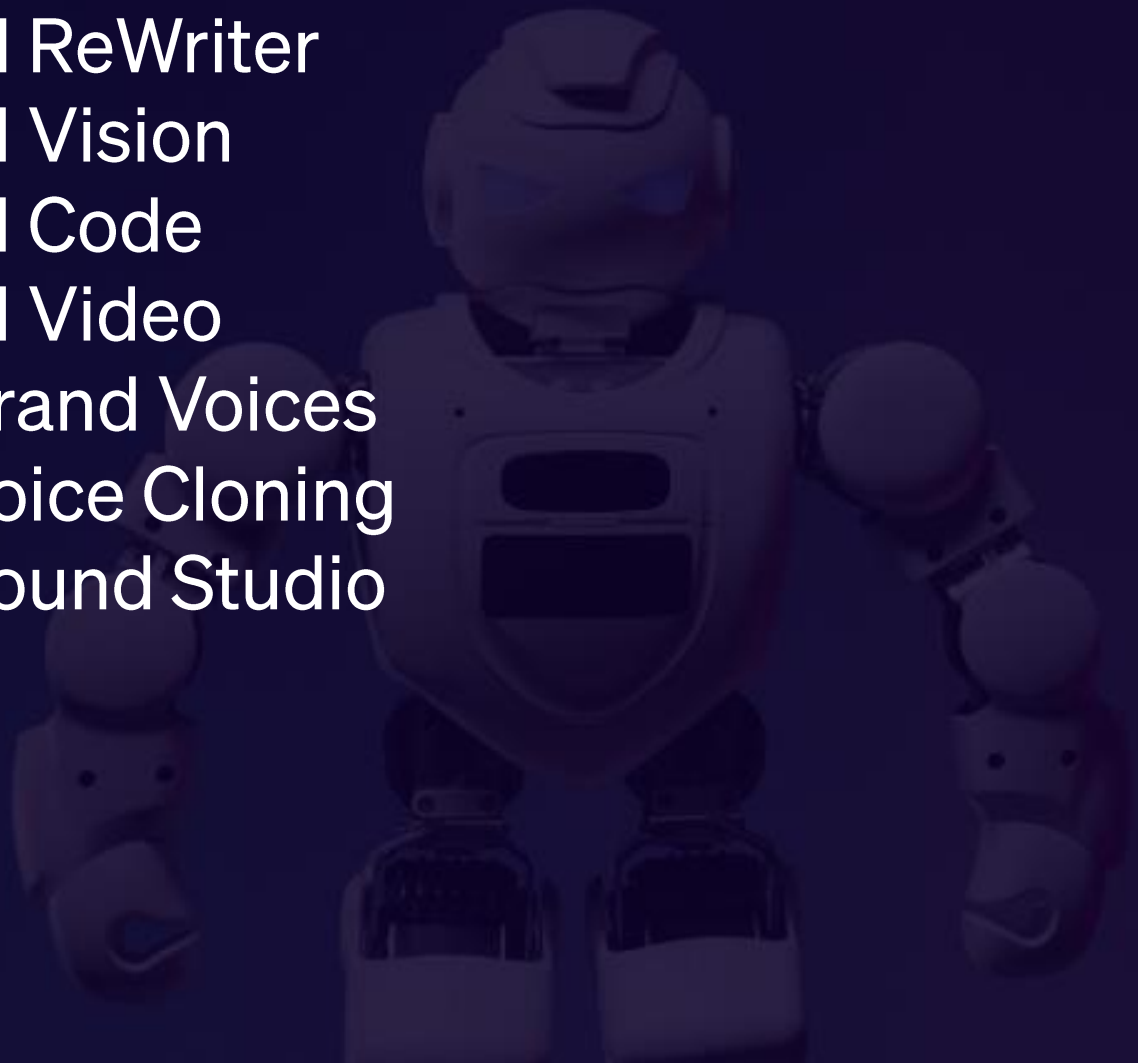

Our Services

- Users have access to sophisticated **OpenAI** Artificial Intelligence technology, enabling them to generate various types of content including Text Contents, Blog Posts, Long Articles, Ads, Media Content, and more in over **53** languages using the latest **GPT-4o** model.

- Users can create AI Images simply by describing the image using **OpenAI DALL-E 3 HD** and Stabl**e Diffusion** solutions by Stability.ai.

- Our platform also offers an **AI Code** feature, allowing users to generate code in any programming language with the help of AI.

- Our interactive **AI Chat** Bot system enables users to ask questions and receive customized results, with 42 AI Chat Bot Assistants available by default, similar to the ChatGPT platform.

- Users can also create **Unlimited** Chat Bots using the new OpenAI Assistant feature.

- Users can transcribe audio and video files using the Speech to Text feature via the **OpenAI Whisper** model.

- Users can generate **AI Voiceovers** with over **1700 Voices** and **150 Languages** and Dialects. They can combine up to **20 Voices** from different TTS vendors in a single task and synthesize text up to **100K characters**. All of these functionalities are powered by leading cloud service providers such as **ElevenLabs, OpenAI TTS, Microsoft Azure, AWS Polly, and Google Cloud Platform**.
